## 3-2-1 Strategy

<b>3</b>	<b>Things I Found out</b>  50% of technology is made at Foxconn.  It is stated that they have bad working conditions but we saw the statement made by Steve Jobs, 4:28, which contradicts that statement
<b>2</b>	<b>Interesting or Unusual Things</b>  Something I found unusual was that people were committing suicide from the factory itself and as a safety precaution Foxconn installed a net around the entity of the outside of the building.  Another thing that I found interesting was that Steve Jobs said they had all of this nice stuff in the factory but we have no proof of that whatsoever.
<b>1</b>	<b>Questions I Still Have</b>  A question I still have is why is there nothing in place to enforce the regulations that Apple put in place to make that states the factory workers can only work up to 60 hours in a week.  Another question I have is how much are they getting payed? Do the get health care at all?
